CASE STUDY - CLIENT: GLUCERNA

CONCEPT DEVELOPMENT- t-DNA

BRIEF:

The tDNA WebApp launch event, aimed at supporting diabetes patients with their diet, was a collaboration between Glucerna and Abbott. The event took place during the VADE 2024 conference. To ensure the event was professional, engaging, and visually cohesive, a unified Key Visual was created as the foundation for all event designs.

REQUIREMENTS:

- Focus on scientific accuracy
- Visualize data and metrics
- Use a logical and easily accessible layout
- Ensure consistency across all event materials to strengthen brand recognition
- Create a memorable experience that effectively communicates the key messages of the event

SCOPE OF WORK:

- 1. Concept design
 - Kev visual
 - Main wall, Standee, Innovation
 - Booth design
 - Backdrop
- 2. Video edit
 - Storyboard
 - Footage
 - Animation
 - · Background music & Sound effect

CONCEPT DEVELOPMENT - SYMPOSIUM

BRIEF:

Symposium on Nutritional Treatment for Inpatient Diabetic Patients is a scientific conference organized by Abbott in collaboration with VietSPEN, to be held in August 2024. The event focuses on providing in-depth scientific information, updating the latest research, and sharing experiences on the role of nutrition in blood glucose control and improving the quality of life for inpatient diabetic patients.

REQUIREMENTS:

- Provide in-depth scientific information on nutritional treatment for inpatient diabetic patients.
- Update the latest clinical knowledge on how nutrition contributes to controlling blood glucose levels and improving quality of life.
- Develop a professional and cohesive event identity to enhance brand recognition and engage healthcare professionals (HCPs).

SCOPE OF WORK:

- 1. Concept design
 - Key visual
 - Main wall, Standee, Innovation
- 2. Video edit
 - Storyboard

ORGANIZING THE DIAG 2025 EVENT

INTRODUCTION:

Diag is hosting a scientific conference on "Advancing the Application of NIPT Using NIFTY® Technology in Prenatal Screening," providing healthcare professionals (HCPs) with the latest insights and updates on non-invasive prenatal testing. The event highlights the role of NIFTY® technology in improving accuracy, safety, and efficiency in detecting genetic abnormalities, supporting a more comprehensive and modern approach to prenatal care.

CONCEPT & EXECUTION:

- The event's key visuals are consistently designed to highlight the theme of NIPT with NIFTY® technology in prenatal screening.
- It will be held in a hybrid format, combining in-person and online participation to broaden reach and foster expert discussions.

COMPREHENSIVE EVENT SOLUTIONS:

- Professional Media & Livestream
- Audio & Lighting Setup
- Venue Arrangement
- POSM Production
- Technical Support & Program Coordination

RESULTS

- Over 600 doctors registered for the event
- More than 300 doctors joined online via Zoom
- Over **300 guests** attended the event in person

ORGANIZING THE REDO MARKETING 2025 EVENT

INTRODUCTION:

Ho Chi Minh City Dermatology Hospital, in collaboration with Redo Marketing Vietnam, successfully organized the scientific conference "New Trends in Comprehensive Facial Rejuvenation with Hyaluronic Acid."

Event Date: February 24, 2025

Venue: Capella Gallery Hall, Ho Chi Minh City

- Media Services

ORGANIZING THE DIAG 2024 EVENT

INTRODUCTION:

Diag is hosting a scientific conference on "Optimizing Risk Assessment and Comprehensive Management of Cardiovascular Diseases," providing the latest medical updates and optimal solutions in diagnosis and treatment for healthcare professionals (HCPs) in response to the rising prevalence of cardiovascular diseases.

CONCEPT & EXECUTION:

- The event's key visuals are carefully designed and extended into various POSM materials to clearly convey the conference's cardiovascular theme.
- The event will be held in a hybrid format, combining both in-person and online participation to expand audience reach and foster in-depth discussions among experts.

COMPREHENSIVE EVENT SOLUTIONS:

- Professional Media & Livestream
- Audio & Lighting Setup
- Venue Arrangement
- POSM Production
- Technical Support & Program Coordination

RESULTS

- Over 600 doctors registered for the event
- More than 250 doctors joined online via Zoom
- Over 200 guests attended the event in person

ORGANIZING THE DIAG 2024 EVENT

INTRODUCTION:

The scientific conference on "The Significance of Preconception Screening and the Latest Updates in Cervical Cancer Diagnosis and Treatment" aims to provide in-depth knowledge and the latest advancements in obstetrics and gynecology, addressing the increasing prevalence of reproductive health issues.

CONCEPT & EXECUTION:

- The Key Visual is designed with the image of a "Pregnant Mother" as the central theme, effectively conveying the importance of preconception screening and cervical cancer testing.
- The event will be held in a hybrid format, combining both in-person and online participation to expand audience reach and facilitate in-depth discussions among experts.

COMPREHENSIVE EVENT SOLUTIONS:

- Professional Media & Livestream
- Audio & Lighting Setup
- Venue Arrangement
- POSM Production
- Technical Support & Program Coordination

RESULTS

- Over 1,000 doctors registered for the event
- More than 550 doctors joined online via Zoom
- Over 200 guests attended the event in person

ORGANIZING THE DIAG 2024 EVENT

INTRODUCTION:

The medical conference on "The Value of Hepatitis B and C Test Panels in Clinical Practice" is organized to provide the latest updates on hepatitis B and C for healthcare professionals (HCPs) nationwide, addressing the rising prevalence of these infections.

CONCEPT & EXECUTION:

- A visually striking and intuitive Key Visual is designed to clearly convey the value of hepatitis B and C testing in clinical practice.
- The event will be conducted in a hybrid format, combining both in-person and online participation to expand audience reach and facilitate in-depth discussions among experts.

COMPREHENSIVE EVENT SOLUTIONS:

- Key Visual & Event Collateral Design
- Professional Media & Livestream
- Audio & Lighting Setup
- Venue Arrangement
- POSM Production
- Technical Support & Program Coordination

RESULTS

- Over 700 doctors registered for the event
- More than **500 participants** joined online via Zoom
- Over **120 guests** attended the event in person

CASE STUDY - CLIENT: GLUCERNA

DESIGN KEY VISUAL (KV)

BRIEF

Design Key Visual (KV) focusing on two main messages:

- Help reduce HbA1c by 1.1% after 6 months
- Control blood glucose within the target range for about 90% of the day

KV used for upstream channels, ensuring scientific clarity while being appealing and easy to understand for consumers.

REQUIREMENTS:

1. Product KV

 Highlight the main benefits of the product, such as blood glucose control, HbA1c reduction, and reducing the risk of complications. Use powerful visuals like arrows or blood glucose lines, with color accents to enhance scientific and visual appeal.

2. Thematic KV

 Use talent images to inspire and motivate consumers. Showcase a healthy, active, and positive lifestyle, consistent with the Glucerna brand's direction. Talent appears in a real-life setting, showing a connection with the product, adding credibility.

SCOPE OF WORK:

Developing Product Key visual and Thematic KV

CASE STUDY - CLIENT: JOHNSON'S BABY

3D EXHIBITION BOOTH DESIGN

INTRODUCTION:

With the "Vườn ươm da sữa" Activation Project, Johnson & Johnson aims to design a professional, captivating 3D booth to communicate the message of its Johnson's Baby Sữa & Gạo Shower Gel product line.

MESSAGE:

"10x tinh chất dưỡng ẩm từ sữa & gạo BẢO VỆ & NUÔI KHỎE LÀN DA BÉ TỪ LẦN TẮM ĐẦU TIÊN"

CONCEPT & EXECUTION:

The concept revolves around creating a baby skin care nursery infused with the nourishing power of milk & rice, featuring a green and white color scheme as the primary theme.

Area 1: Chuyện cổ tích vườn ươm

Area 2: Hành trang cơ bản trước khi ươm sữa

Area 3: Bí mật dưỡng chất diệu kỳ

Area 4: Khu vườn ươm da

Area 5: Nhà kính vườn ươm bé

Minigame Area 1 – Khám phá làn da bé

Minigame Area 2 – Khám phá sữa và gạo

Project: Game Development - Johnson's Baby

Introduction:

"Vườn Ươm Da Sữa" is an interactive game designed for event guests, aiming to convey the message of a body wash product enriched with rice and milk – two ingredients that help moisturize and soothe babies' delicate skin.

Message:

"VƯỜN ƯƠM DA SỮA

Tưới sữa gạo sao cho các bông hoa đều cười"

Game experience

Storyboard

3D EXHIBITION BOOTH DESIGN

INTRODUCTION:

Docquity, as a key sponsor at the Vietnam Obstetrics Conference 2024, wanted to design a striking 3D booth that showcases the brand and attracts HCPs. The event introduced the **Optibac Baby Drops** and **Optibac Babies** & Children products to help promote and strengthen immunity for children

CONCEPT & EXECUTION:

The booth design is simple yet inviting, creating an open space for visitors to engage. The primary color tones are blue and pink, representing the two main products:

Optibac Baby Drops and Optibac Babies & Children.

The booth features interactive elements like a Lucky Draw and Kahoot Game to engage visitors and spread brand awareness about the products.

FEATURES OF THE BOOTH:

- Check-in area
- Product display area
- Lucky Draw
- Kahoot game
- Product information TV screen

CASE STUDY - CLIENT: LISTERINE

3D PRODUCT ANIMATION VIDEO

CONTEXT:

At the beginning of 2025, Listerine launched an advertising campaign utilizing 3D 00H technology to deliver the message:

"5X Giảm Mảng Bám - Khoang Miệng Sạch Toàn Diện."

This campaign highlights the benefits of two product lines: **Listerine Cool Mint** – for long-lasting fresh breath. **Listerine Total Care** – comprehensive protection with 10 benefits in 1.

CONCEPT & EXECUTION:

The campaign leverages the mascot of the 2025 Year of the Snake (Ất Ty) with a cute and friendly design, enhancing audience engagement and effectively communicating the message of comprehensive oral protection through an impressive OOH format featuring Listerine Cool Mint & Total Care.

SCOPE OF WORK:

- Key Visual Development
- Concept Ideation, Creativity & Storyboarding
- 3D Modeling: Snake, Listerine bottles, teeth, toothbrush
- Texture & Material Design
- 3D Graphics Simulation of Water Movement
- Lighting & Polishing
- 3D Rendering
- Post-Production & Video Editing

VIDEO CREATION - WOLF 2.0

BRIEF:

The **Wolf 2.0 program** by Glucerna aims to engage customers through a reward point system via QR code scanning. It helps users understand how to participate and fully utilize the benefits of the program. The project focuses on creating instructional videos to ensure clear and engaging content delivery.

REQUIREMENTS:

- Clear Communication: Guide users through the process of earning reward points step by step.
- **User-friendly Interface**: Create an animation and visual design that makes it easy for users to follow and interact with.
- **Brand Consistency**: Use Glucerna's signature colors, design, and visuals to maintain a strong brand identity.
